Memorandum

25X1A

TO : Director of Logistics, OL
ATTN : Mr. [REDACTED]
FROM : Chief, Communications Security Staff, OC

DATE: 3 MAR 1964

CSD 64- 159

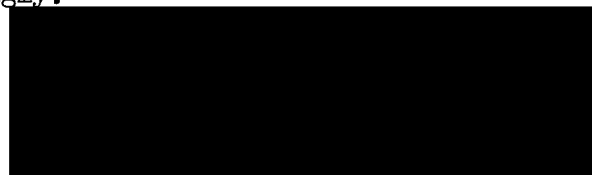

SUBJECT: Coreboard Destructors

REF : CSD 64-103

1. We have been advised that twenty Coreboard Destructors will be needed for evaluation and environmental testing by the Equipment Suitability Group, and five units will be selected at random from production for functional inspection. This memorandum is to confirm that the twenty-five units to be requisitioned by TSD may be supplied from stock established for the Office of Communications requirements.

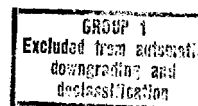

2. The units should not come from the first one hundred and fifty units which have been received from the manufacturer. Priorities for these units have already been submitted to the Office of Logistics. Also, the arrangements that will be made to procure units for testing should not change the initial order of 600 units obligated to Office of Communications requirements. The twenty coreboard destructors to be used for testing by TSD should be treated as an additional requirement and stock replenished accordingly.
